Housing quality and maintenance

Quality of housing

Scottish Housing Quality Standard (SHQS) – Stock condition survey information (Indicator C8)

C8.1	The date your organisation's stock was last surveyed or assessed for compliance with the SHQS	03/2020
C8.2	What percentage of stock did your organisation fully assess for compliance in the last five years?	48.00
C8.3	The date of your next scheduled stock condition survey or assessment	03/2021
C8.4	What percentage of your organisation's stock will be fully assessed in the next survey for SHQS compliance	10.00
C8.5	Comments on method of assessing SHQS compliance.	

Easthall Park has appointed independent consultants (Langmuir & Hay and Brown & Wallace) throughout the years to carry out stock condition surveys at various addresses within our stock. EHP has completed analysis of over 60% of our stock since 2009. This includes using information from our new build stock that was built from 2008 to 2010 and the external surveys of remaining stock. The information collected from the surveys and known data was compiled from sampling various property types and then applied to the remainder of the stock. Our current stock consists of flats, main door properties and tenement blocks that are either new build or have had significant investment applied since Easthall Parks inception. Information returned from the independent consultants confirms that our stock is fully compliant with SHQS 2015.

Comments regarding C8.3 - consultant has advised that they do not think it is worthwhile or necessary to carry out further survey in March 2021. Committee had set aside funds to undertake this work but will review based on comments from consultant.

Comments (Housing quality and maintenance)

In 2019/20 Easthall Park carried out a total of 640 internal phone surveys of reactive repairs carried out in the reporting year. Some of the repairs surveyed are for the same property, but for different repairs carried out within the reporting year. The information provided at indicator 12 is calculated using information from these properties using the most recent repair only.
